AWARD WINNING MODERN HEALTHCARE FACILITY

Master Builders Tasmania Awards for Excellence – 2016
Award: New Construction Over \$10 Million

The North-West Regional Hospital redevelopment significantly expanded the facility, enhancing critical healthcare services. Key upgrades included a new MRI facility, an extended and refurbished emergency department, and a three-story Cancer Care Centre housing oncology, radiation treatment, and support services. Working within a fully operational 24/7 hospital, Vos carefully staged construction to minimise disruption while ensuring essential services remained accessible.

COMMUNICATION & COLLABORATION

Traffic and pedestrian management were crucial due to the site's location across the hospital's main entrance and carpark.

This modern healthcare facility was delivered successfully through close collaboration with stakeholders, strategic planning, and a flexible approach, ensuring future expansion capabilities.
