

Penguin District School Major Redevelopment

Department of Education, Children & Young People

\$18.9m

2023

STAGED CONSTRUCTION

To keep the school operational, Vos carefully staged construction across multiple phases, aligning major works with school holidays to ensure sufficient teaching space. Pedestrian safety and access were a priority, allowing students and staff to move safely throughout the site.

The project faced challenges from COVID-19 outbreaks and widespread supply chain shortages, requiring strict hygiene measures and strategic planning to source materials and prevent delays.

The Penguin District School redevelopment delivered modern, state-of-the-art learning facilities, consolidating primary and secondary campuses on the existing secondary site. The project involved major demolitions, refurbishments, five new buildings, extensive landscaping, and improved parking and transport infrastructure.
