

Dove Lake Viewing Shelter

Parks & Wildlife Service Tasmania

\$8.5m

2023

AWARD WINNING COMBINATION OF DESIGN AND INFRASTRUCTURE

*Master Builders Tasmania Awards for Excellence – 2023
Award: New Construction Over \$5 - \$10 Million*

*Master Builders Tasmania Awards for Excellence – 2021
Award: Soil & Water Management*

*Concrete Institute of Australia - 2023
Award: Excellence in Concrete Awards*

The remote alpine location posed challenges, requiring careful planning for material delivery and construction, particularly for the complex roof structure. Stringent environmental controls, such as managing water on-site and restricting truck washouts, were enforced. The strong collaboration between the VOS Site Manager and architect was key to delivering the project successfully in this challenging environment.

Project Manager: Leigh Kingshott

Site Manager: Jeff Bingham

Project Administrator: Jessie Clow

MINIMISING ENVIRONMENTAL IMPACT

The Dove Lake viewing shelter serves as the arrival point for visitors, blending seamlessly into the Tasmanian Wilderness World Heritage Area. Designed to mimic the surrounding landscape, the shelter features profiled concrete to encourage plant growth, minimising environmental impact.
